

# Saving Galápagos landbirds

**Ben Stockwell**

Perhaps the world's most famous archipelago, the Galápagos is justifiably subject to considerable attention from conservationists. This article summarises three important projects seeking to save endemic landbirds from extinction.

All photographs taken on the Galápagos, Ecuador.

**1** Floreana Mockingbird *Mimus trifasciatus* perched on the cactus *Opuntia megasperm*, Champion, February 2012 (Luis Ortiz-Catedral/GCT).
