# Birding northeast Suriname

**Remco Hofland**

With extensive primary forest and healthy populations of Guianan Shield endemics, it is mystifying that Suriname is not routinely on the birder's trail. This article provides an update on two previous features in Neotropical Birding.

1 Birding in Suriname's Guianan Shield forests, Zintete-Fredberg, November 2019 (Diederik Kok).

All photographs were taken in Suriname.
